***What happens when you pour grease down the sink?***

If you have public sewer service, grease and oil collects in grease traps in the sewer system. Over time, oil and grease accumulates causing backups in your home or business' water system, or worse, full-on blockages of the entire sewer line. If you have a septic system, grease and oil can collect in your septic lines and tank, causing pipe blockages and expensive pump-outs by a service company. Pouring your used cooking oil outside can attract vermin and can runoff into streams and rivers.
