CITY COUNCIL AGENDA ITEM SUMMARY

ITEM TITLE:

Approval of the City Administrator's Emergency Purchase of Services to Repair and Upgrade the City's Fleet Fueling System at 135 W. Grandlake Boulevard – Accurate Tank Construction, Inc.

AGENDA ITEM NUMBER: 8.B.**COMMITTEE AGENDA DATE:****COUNCIL AGENDA DATE:** August 1, 2016**STAFF REVIEW:** Robert E. Flatter, P.E., Director of Public Works**SIGNATURE** _____**APPROVED BY CITY ADMINISTRATOR:** Michael L. Guttman**SIGNATURE** _____**ITEM SUMMARY:**

Annually, as required by the EPA and monitored by the State Fire Marshall for compliance, the City must have its fuel system pressure tested for leaks. On Thursday, November 5, 2015 our system was tested. The diesel fueling system passed, but the unleaded fueling system failed. It was found that the unleaded fuel line between the existing fuel tank and the dispenser (fuel pump) needs to be replaced. In 1986 when the fiberglass fuel tank(s) were installed a portion of the fuel line(s) from the tank(s) to the dispenser(s) were also upgraded to fiberglass type piping. However, the portion of piping under the concrete fuel island and dispenser was not upgraded and this portion of steel piping developed a leak below the dispenser. Since steel piping no longer allowed and cannot be repaired, replacement was warranted/required. Also any repair triggers/requires the remaining portion of the fueling system to be upgraded to current standards. The City Council was informed of the system failure on November 12, 2015 and the need for the City Administrator to make the repairs using his emergency purchasing authority, which requires City Council approval after the project is done and the final cost is known.

As a result, the following upgrades were completed by Accurate Tank Construction, Inc:

- New dispensers were installed.
- Containment system was installed under the new dispenser.
- New fueling island was installed.
- New fuel management system was installed.
- New tank top concrete pad including all necessary manholes was installed.
- New tank top piping containment sumps were installed.
- New submersible pumps were installed.
- New overfill valves in fill risers on both tanks (i.e., unleaded and diesel) were installed.
- Eight-inch PVC well screens were installed inside the existing bowels sump.
- Emergency shut-off switch was replaced with appurtenant wiring.
- Electrical wiring and conduit were replaced, relocated, or upgraded as necessary.

The existing 1986 fiberglass fuel tanks were not replaced as part of this project.

Testing was conducted and passed by the State Fire Marshall's Office.

The final cost of the emergency repairs and upgrades is \$119,900.00. The project is mostly paid for from the General Fund (\$73,570.00 from Public Works-Road & Bridge (01-09-24-4225)) with \$9,335.00 being paid from the Sewer Fund (05-34-43-4225), \$9,335.00 being paid from the Water Fund (05-34-43-4225), and \$27,660.00 being paid from the Capital Projects Fund (08-34-53-4888). This item will be included in a Budget Amendment later this year.
