Keith Parks of Frank's Auto Repair is requesting the approval of three special uses for an automobile repair shop, a self-storage facility, and outside storage associated with the construction of a new facility to be located at 927 W. Washington Street. Mr. Parks is also requesting a variance to reduce the required rear yard landscape setback. The vacant subject property is approximately 1 acre in area and is located on the north side of W. Washington Street between Town Road and Fenton Lane.

The applicant is proposing to construct a 5,000 square foot building with ancillary parking and an outside storage yard located north of (behind) the building. The proposed building will be used for an automobile repair shop. Approximately 1,000 square feet of the building will be utilized for office and the customer service area. The remaining 4,000 square feet will be used as auto repair shop space. The storage yard will be used for the parking of vehicles being repaired as well as leased parking space for the storage of third party vehicles such as autos, boats, and RVs. The storage yard will be paved and screened with an 8 foot tall solid screen privacy fence and landscaping, as required by City Code.

As part of the development of the property the applicant is also requesting a variance to reduce the required rear yard landscape setback from 15 feet to 10 feet in order to maximize the area of the proposed storage yard.

Final engineering has not been approved as of the completion of this staff report. However, final engineering will be approved prior to the issuance of a building permit for the site. If any significant modifications to the site design or layout are implemented then the development will have to go back through the approval process for further consideration. Stormwater detention is being provided for in a regional detention basin located north of the subject property. There are ancillary drainage swales being proposed along the north lot line, in the landscape buffer that separates the parking lot from the storage yard, and immediately south of the building.

The subject property will share a private driveway with the adjacent site to the east. The shared driveway is located in an existing shared access easement. The subject property will then have two access points onto the shared private driveway, both of which will be located north of the proposed building, be used to gain access to the proposed storage yard and overhead doors on the north facade of the building, and both are designed for two-way traffic flow. All aspects of the subject property's proposed traffic circulation comply with the City's minimum Code requirements.

City Code requires a minimum of 8 parking spaces on-site based on the proposed total square footage of the building (4 parking spaces per every 1,000 square feet of office/customer service floor area and 1 parking spaces per every 1,000 square feet of repair shop floor area). 8 total parking spaces are proposed to be located outside of the storage yard. All of the proposed parking complies with the City's minimum design requirements for quantity, stall length, and stall width.

The applicant is proposing landscaping along the south, east, and west property lines. The landscaping is a mixture of shade and evergreen trees, shrubs and perennials, as required by City Code. The applicant is also proposing landscaping in the parking lot landscape islands and around the building's foundation, as required by City Code. The applicant is required to provide landscaping along the north property line, but is requesting that in conjunction with the reduction is the required landscape setback along said north lot line that the required landscaping be installed along the east and west sides of the storage yard. This will effectively provide greater screening of the storage yard from Washington Street. All of the proposed landscaping on-site complies with the City's minimum landscaping requirements, subject to approval of the requested variance.

The applicant is proposing a metal exterior industrial building with a flat roof. There will be a 3 foot band of masonry material along the base of the building for aesthetics. The (rear) north facade of the building will have 6 overhead doors. The subject property is not required to comply with the City's Appearance Code requirements because all property zoned Manufacturing is exempt.

At its October 3, 2017 meeting, the Plan Commission/Zoning Board of Appeals (PC/ZBA) recommended approval of the special uses for an automobile repair shop, a self-storage facility, and outside storage, as well as a variance to reduce the required rear yard landscape setback from 15 feet to 10 feet for the property commonly known as 927 W. Washington Street by a (5-0) vote. Their recommendation is included as Exhibit "B" of the attached ordinance.

ACTION PROPOSED:

Consideration of special uses for an automobile repair shop, a self-storage facility, and outside storage, as well as a variance to reduce the required rear yard landscape setback from 15 feet to 10 feet for the property commonly known as 927 W. Washington Street.

COMMITTEE RECOMMENDATION:

At its October 9, 2017 meeting, the Development Committee recommended approval of the special uses for an automobile repair shop, a self-storage facility, and outside storage, as well as a variance to reduce the required rear yard landscape setback from 15 feet to 10 feet for the property commonly known as 927 W. Washington Street.

ITEM SUMMARY:

On Monday, June 3, 2013, the City Council approved Resolution No. 13-R-0044, authorizing the Mayor to execute a Contract Agreement with Mack Construction Corporation (Mack) for professional services related to the 2013 Main Street Tunnel Improvement Project, for an amount not to exceed \$669,763.50. The 2013 Main Street Tunnel Improvement Project consisted of, but was not limited to, removal and replacement of Portland cement concrete ramps, sidewalk and retaining walls, installation of sheet piling with cast-in-place facing, drainage structure adjustments, tunnel and path light, brick paver installation, decorative railing installation, along with restoration and landscaping and all incidental and collateral work necessary to complete the project as shown on the design plans and described in the project specifications. Per the project specifications, the project was to have commenced by Monday, June 17, 2013, and be completed by August 12, 2013. Pending weather conditions, there was a provision that would allow the City to extend the project completion date to September 14, 2013, for installation of landscape material only.

On June 20, 2013, after receiving executed contracts, insurance documents, and Performance Bond from Mack, the City issued a Notice To Proceed letter to Mack with a reminder that the project must be complete by August 12, 2013, and that payment of prevailing wage and certified payroll was required. This project was not completed until August 28, 2015; all delays were attributed to Mack's performance, or lack thereof. To date, the City has not made final payment on the project, the City has imposed \$371,500.00 in liquidated damages against Mack, and the City's attorney continues to work with Mack's attorney to close out the project and resolve final payment related issues.

During construction, fourteen change order requests were submitted from Mack for additional work. Work related to nine of the fourteen changes orders was authorized by City staff to keep the project moving forward. The nine change orders authorized totaled \$108,959.36 in additional charges. All change orders are summarized below:

Change Order No. 1 – Void.

During construction it was determined that an existing street light cable needed to be relocated to accommodate site grading, which was not foreseen when the project was designed. Work was completed by the City using Meade Electric. Work associated with this change order was discussed with the Infrastructure Committee on September 5, 2013.

Change Order No. 2 – Replacement of Cistern with Storm Sewer Catchbasin - \$18,150.00.

During construction it was discovered that the tunnel's floor drains discharged into an old twenty-five foot deep timber cistern with a plywood top. The cistern was replaced with a concrete storm sewer catchbasin structure. City staff was aware of the old railroad cistern, but had no prior knowledge of its use or purpose. For safety reasons, the cistern was replaced with a concrete storm sewer catchbasin. Work associated with this change order was discussed with the Infrastructure Committee on September 5, 2013.

CITY OF WEST CHICAGO

Change Order No. 3 – Void.

Contractor attempted to seek additional compensation associated with a sheet piling conflict, related to the existing overhang for the Helen Fox Community Center. Change Order was rejected and work was completed within existing project scope and unit pricing. Work associated with this change order was discussed with the Infrastructure Committee on November 7, 2013.

Change Order No. 4 – Unsuitable and Non-Special Waste Hauling - \$18,044.00.

While excavating around the tunnel, the excavated soil material would not be accepted from a Clean Construction or Demolition Debris (CCDD) disposal facility with submission of a Clean Uncontaminated Soil Certification for the site. Midwest Environmental Consulting Services, Inc. was hired by the City to collect and analyze soil samples for certification sign-off. Laboratory analytical test results determined that the site's soils exceeded IEPA Tiered Approach to Corrective Action Objectives (TACO) maximum allowable concentrations for Arsenic, Dibenzo(a,h)anthracene, Mercury, and Selenium. To address the unforeseen soil chemistry, the excavated material (24 semi-loads) had to be classified as "non-special waste" and taken to an EPA approved landfill. Additional haul costs incurred by Mack resulted in an overall project increase of \$18,044.00.

Change Order No. 5 – Tunnel Floor Drains - \$21,023.00.

Additional work requested by the City to install additional floor drains inside tunnel to help eliminate water seepage through wall joints and standing water on floor which results during large rain events and snow melt. Work associated with this change order was discussed with the Infrastructure Committee on April 3, 2014.

Change Order No. 6 – Additional Reinforcement associated with Tunnel Wall Design Change - \$3,905.00.

Additional rebar reinforcement necessary for change in condition from a sloped wall to a vertical wall for the top of the existing tunnel entrance wall (north end) and the addition of a water stop. Condition unforeseen until site excavation was completed and existing tunnel wall was exposed. Work associated with this change order was discussed with the Infrastructure Committee on April 3, 2014.

Change Order No. 7 – Reconstruction of headwall at north and south ends of tunnel - \$25,131.00.

During demolition it was determined that the existing tunnel headwalls, both north and south ends, had deteriorated over the years and were no longer structurally sound. Both headwalls had to be reconstructed and reinforced with additional rebar. Condition unforeseen until site excavation and demolition was completed and existing tunnel headwall was exposed. Work associated with this change order was discussed with the Infrastructure Committee on April 3, 2014.

Change Order No. 8 – Additional Tunnel Wall Patching - \$17,481.36.

Additional grinding and patch work requested by the City on interior walls of tunnel (approximately 371 square feet). Nominal quantities of grinding and patch work were originally identified in bid documents and on engineering plans, but actual limits and condition of interior walls were not known until contractor removed several layers of paint from walls. Work associated with this change order was discussed with the Infrastructure Committee on April 3, 2014.

Change Order No. 9 – Void.

Contractor attempted to seek additional compensation associated with changes in limits of concrete gutter. Change Order was rejected and work was completed within existing project scope and unit pricing.

Change Order No. 10 – Additional Concrete Coring - \$460.00.

Additional concrete core needed through tunnel wall to accommodate tunnel lighting. Not foreseen when project was designed.

Change Order No. 11 – Void.

Contractor attempted to seek additional compensation associated with the removal and reinstallation of brick pavers. Change Order was rejected and work was completed within existing project scope and unit pricing.

CITY OF WEST CHICAGO

Change Order No. 12 – Void.

Contractor attempted to seek additional compensation associated with an extension of the ramp walkway on the south end of the project to comply with ADA requirements. Change Order was rejected and work was completed within existing project scope and unit pricing.

Change Order No. 13 – Electrical conduit paint credit – (\$750.00).

Contractor covered electrical conduit inside tunnel with anti-graffiti coating prior to painting. Credit issued to City for not painting electrical conduit.

Change Order No. 14 – Additional decorative railing - \$5,515.00.

Additional decorative railing necessary to comply with field changes, site conditions, and ADA requirements.

In addition to a contract increase resulting from additional work authorized by the change orders referenced above, final project quantities measured in the field at end of project and paid at contract unit prices resulted in a project increase of \$5,529.20.

Therefore, total change order associated with the 2013 Main Street Tunnel Project resulted in an overall project increase of \$114,488.56, bringing the total contract amount to \$784,252.06. Even if the liquidated damages imposed and previously referenced are upheld, the total change order in the amount of \$114,488.56 needs to be approved by City Council.

There are adequate funds available in the Capital Projects Fund to cover this budget overage.

ACTIONS PROPOSED:

Approve Change Order #1 and final to the Contract with Mack Construction Corporation, for the 2013 Main Street Tunnel Project, for a total addition to the contract in the amount of \$114,488.56.

COMMITTEE RECOMMENDATION:

The Infrastructure Committee voted 5-0 for approval.
