Residential Decks—Information Sheet

**Frost Footings:**
Required for any deck. The minimum depth from finished grade to the base of the footing is 42 inches. Diameter of 8 inches for 4x4 posts and 12 inches for 6x6 posts.

**Live Load:**
All decks shall be designed to support a live load of 60 pounds per square foot.

**Cantilevers:**
Joists should not overhang beams by more than two feet, nor should beams overhang posts by more than one foot.

**Flashing:**
It is recommended that any cuts in exterior finish be flashed.

**Framing Details:**
Header beams and joists over 4 feet that frame into ledgers or beams shall be supported by approved framing anchors, such as joist hangers. Blocking is required where joists are lapped.

**Nails & Screws:**
Use only stainless steel, high strength aluminum or hot-dipped galvanized.

**Wood:**
All exposed wood used in the construction of decks is required to be an approved wood of natural resistance to decay (redwood, cedar, etc.) or an approved treated wood.

**Stairs:**
Minimum width is 36 inches. Maximum rise is 7 3/4” inches. Minimum run is 10 inches. Stringers must be supported by slab or piers at grade.

**Guardrails:**
Required on all decks more than 30 inches above grade. Rail must be a minimum of 36 inches in height. Open guardrails and stair railings must have intermediate rails that a four-inch sphere cannot pass through.

**Handrails:**
The top shall be placed a minimum of 34 inches above the nosing of the treads. Stairways having three or more risers shall have at least one handrail. The handgrips shall not be more than 2-3/8 inches in cross-section. The handgrip shall have a smooth surface with no sharp corners.

**Supports:**
Wooden post support for decks with finished floor construction six- feet (6’) or more above grade shall be no less than six-inch by six-inch (6”x6”) nominal lumber.
