

# 2022 STREET STRIPING PROGRAM

## Construction Newsletter

April 27, 2022

---

The purpose of this newsletter is to inform you that the 2022 Street Striping Program (Program) is anticipated to begin the week of Monday, May 2, 2022. This tentative start date is based upon a preliminary schedule provided by the Contractor (Precision Pavement Markings, Inc.) and is subject to change based on weather conditions. Construction is anticipated to be completed prior to July 2022, weather permitting.

The program consists of replacing or refreshing existing pavement markings on various streets throughout the City. Street striping locations, depending on volume and budget, may include the roadways as shown on the 2022 Street Striping Program Location Map.

During operations, it is essential that no cars be in the way of the contractor's equipment. Please avoid parking on the street while this work is being performed. All streets will remain open to traffic during construction operations. The material can be driven over shortly after pavement markings operations are installed. The material should be completely cured within a period of one hour, depending on the weather conditions.

Please note that construction activities are scheduled between 7:00 AM and 6:00 PM, Monday through Friday, and between 8:00 AM and 4:30 PM on Saturday at all project locations.

If you should have any questions regarding the 2022 Street Striping Program, please contact Doug Masters, Project Manager, with Thomas Engineering Group, at [dougm@thomas-engineering.com](mailto:dougm@thomas-engineering.com) or at (630) 293-2255. Ext. 534.

For your safety and the safety of the workers, please obey all traffic control signs and flagging operations during the construction process. Thank you in advance for your cooperation and patience during construction.
